### Msk Kinesis Technology:

HMNU Medical Technology is Focus on the Source:The "Myofascial Band".

MSK KINESIS Therapy makes it possible to treat, for the first time, the body's "Myofascial Band".

This is revolutionary because the Band not only holds together the organs and bowels, but is a sophisticated semiconductor system for high intensity piezoelectric energy contained in protein and collagen.

Every bone, muscle, nerve or lymphatic blood vessel is surrounded by a layer of connecting fabric, which is tasked to support and protect these elements. Today the biomechanics insight considers the Band as a fundamental part of the connection tissues action, effecting our muscles, strength, postural, motor and emotional behavioral wellness.

The Band's integrity and elasticity allows the body to maintain a fluid integration between a biomechanic constant postural adaptation.

### Msk Kinesis Therapies:

Our Certified Licensed Operators are providing a complete range of medical and wellness evaluations, assistance, and treatments, including classes for pre and post-rehabilitation.

MSK Kinesis Non Invasive Therapies includes back & neck pain treatment, Tendinopathy (Sciatic and Lumbago), Rachialgia, Fibromyalgia, Sport multi injuries & sport capacity improvement, other pain management applications for pain of Tendinopathy, Rachialgia, Fibromyalgia, Osteoporosis,treatment for Fat and Severe Cellulite reduction.

### Human Unitec International:
